

**GUJARAT TECHNOLOGICAL UNIVERSITY**  
**BArch- SEMESTER- 6 EXAMINATION – SUMMER 2016**

**Subject Code:1065005**

**Date: 13/05/2016**

**Subject Name: ESTIMATING & COSTING**

**Time: 10.30AM – 12.30PM**

**Total Marks: 50**

**Instructions:**

1. Attempt all questions.
2. Make suitable assumptions wherever necessary.
3. Figures to the right indicate full marks.

- Q.1** (a) Define rate analysis and write purpose of rate analysis. **05**  
(b) Explain factors affecting rate analysis. **05**
- Q.2** (a) Find the rate of Plain cement concrete (1:2:4) per cu.m. by rate analysis. **05**  
Assume suitable rates of material and labour.  
(b) Write detailed specifications of following items (ANY TWO) **05**  
1) Earthwork in excavation  
2) First class brick work in cement mortar 1:4 in super structure  
3) Plastering in walls  
4) Reinforced cement concrete (1:1.5:3)  
**OR**  
(b) Give classification of specification and explain. **05**
- Q.3** (a) Work out the quantity of items listed below of chaukidar quarter shown in fig **10**  
(a).  
1) Earth work  
2) C.C. for foundation  
3) II<sup>nd</sup> class brick masonry in CM (1:6) for foundation and plinth  
4) Wood work for doors, windows and ventilators  
(b) Prepare an estimate of a RCC beam as shown in fig (b). (bar bending schedule is not required) **10**
- Q.4** (a) Explain methods for building estimates and explain any one in detail. **05**  
(b) Write modes of measurement as per IS:1200 **05**  
**OR**  
(b) What is the significance of market survey in civil engineering? How the rate of an item is derived by method of rate analysis? **05**
