## GUJARAT TECHNOLOGICAL UNIVERSITY BE- SEMESTER- $\mathbf{1}^{\text {st } /} \mathbf{2}^{\text {nd }} \bullet$ EXAMINATION - SUMMER 2016

## Subject Code: 110013

Subject Name: Engineering Graphics
Time: 02:30 PM to 05:30 PM
Date:09/06/2016
Total Marks: 70

## Instructions:

1. Attempt any five questions.
2. Make suitable assumptions wherever necessary.
3. Figures to the right indicate full marks.
Q. 1 (a) Differentiate between first angle and third angle projection system 4
(b) Draw an isometric scale and show the length of 52 mm on it.
(c) The distance between two places is 300 km . on map it is shown by 15 cm . find the R.F.
Q. 2 (a) Draw a rectangle of $120 \mathrm{~mm} \times 60 \mathrm{~mm}$. draw ellipse in it.
(b) A string is unwound from a hexagon of 25 mm side. Draw the locus of end P for unwinding the one turn of string.
Q. 3 (a) Distance between the end projectors of a line $A B$ is 50 mm . end $A$ is 20 mm above HP and 30 mm infront of VP. End B is 50 mm below HP and 50 mm behind VP. Draw its projections and find true length and true inclination of a line with HP \& VP.
(b) A pentagonal plate having 30 mm side is resting on HP on one of its side which makes $30^{\circ}$ with VP. Plate makes $45^{\circ}$ with HP. Draw its inclination.
Q. 4 (a) A square pyramid side of its base 30 mm and height 50 mm is resting on HP on one side of its base. Axis is inclined at $45^{\circ}$ to HP . The side on which it rest makes $30^{\circ}$ with VP. Draw its projection.
(b) As shown in figure, a slider crank chain has a crank OA 30 cm and connecting rod AB 120 cm . crank rotate in clockwise direction. Draw the locus of midpoint of connecting rod.

Q. 5 (a) A cone diameter off its base 50 mm , height 70 mm is resting on HP on its base. It is cut by an A.I.P bisecting the axis and inclined at $45^{\circ}$ to its base. Draw its sectional plan and true shape of the section.
(b) Figure shows a cut prism. Draw the development of lateral surface of a prism.

Q. 6 Using first angle projection method. Draw the following views for figure.
(a) Front view ( from direction of arrow )
(b) Top view
(c) Left hand side view

Q. 7 The orthographic views of an object using first angle projection method are shown in figure. Draw its isometric view.
