Enrolment No. _____

GUJARAT TECHNOLOGICAL UNIVERSITY
MCA - SEMESTER– I • EXAMINATION – SUMMER 2016

Subject Code: 610003

Date: 09-05-2016

Subject Name: Discrete Mathematics for Computer Science

Time: 02.30 pm To 05.00 pm

Total Marks: 70

Instructions:

1. Attempt all questions.
2. Make suitable assumptions wherever necessary.
3. Figures to the right indicate full marks.

- Q.1** (a) i) Consider the statement, “If today is Monday, then I will go for a walk”. Write converse, inverse and contrapositive for the given statement. **04**
ii) Test whether the given arguments are logically valid or not. **03**
“If it rains, the prices of vegetables go up. The prices of vegetables go up. So it rains.”
- (b) 1. Let $A = \{1, 2, 3\}$ then show that the inclusion relation \subseteq on A is a partial ordering. **03**
2. Define Direct Product and draw the Hasse diagrams of $\langle S, D \rangle$, $\langle L, D \rangle$ and $\langle S \times L, D \rangle$ for $S = \{1, 3, 6\}$ and $L = \{1, 2, 4\}$. **03**
3. State the Lagrange’s theorem. **01**
- Q.2** (a) Draw hasse diagram for the following. **07**
(i) $\langle S_{60}, D \rangle$ (ii) $\langle S_{100}, D \rangle$.
Here S_n is the set of divisors of n .
- (b) Using indirect proof technique, show that if a^2+3 is odd, then a is even. Where a is an integer. **07**
- OR**
- (b) Show that $\langle S_{30}, *, \oplus \rangle$ and $\langle P(A), \cap, \cup \rangle$ are isomorphic lattices for $A = \{a, b, c\}$. **07**
- Q.3** (a) 1. Consider lattice $\langle S_{10}, *, \oplus \rangle$, where $S_{10} = \{1, 2, 5, 10\}$. Find the complements of the elements of S_{10} . **02**
2. Write the following Boolean expression in an equivalence sum-of products canonical form in three variables x_1, x_2 and x_3 .
I) $x_1 * x_2$. **02**
II) $x_1 \oplus x_2$. **03**
- (b) 1. Show that (Using laws) the following Boolean expressions are equivalent. **02**
(i) $[a * (b' \oplus c)]' * [b' \oplus (a * c)']' = a * b * c'$ **02**
(ii) $(x \oplus y) * (x' \oplus y) = y$
2. By constructing the truth table that prove that $p \wedge (\sim q \rightarrow \sim p) \rightarrow q$ is a tautology **03**
- OR**
- Q.3** (a) Define: Sub-Lattice. Show that S_6 is sub lattice of lattice $\langle S_{30}, D \rangle$. **07**

- (b) Define: Join-irreducible, Meet-irreducible, Atoms and Anti-Atom.
Determine the join-irreducible, meet-irreducible, atoms and anti-atoms for given lattice.

07

- Q.4** (a) Use the Quine McClusky method to simplify the SOP expansion,
 $F(a,b,c,d) = \Sigma (0, 2, 4, 6, 8, 10, 12, 14)$ and draw the circuit diagram of the minimized function.

07

- (b) Prove that $\langle \mathbb{Z}_{11}^*, *_{11} \rangle$ forms a group with respect to multiplication modulo 11.

07

OR

- Q.4** (a) Prove that the relation “Congruence modulo n ” given by $\{ \langle x, y \rangle \mid x-y \text{ is divisible by } n \}$ is an equivalence relation.

07

- (b) i) Show that $(\mathbb{Z}_6, +_6)$ is a cyclic group of order 6 and also find its generators.

05

ii) In any Boolean algebra, show that

02

$$a \leq b \Rightarrow a \oplus (b * c) = b * (a \oplus c)$$

- Q.5** (a) i) Define Multigraph.

01

ii) Define adjacency matrix of a digraph. Obtain the adjacency matrix A of the given digraph. Find the elementary paths of lengths 1 and 2 from v_1 to v_4 .

06

- (b) Define directed tree. Draw different representation of the following tree.

01

06

OR

- Q5. (a)** Find the strong components of the following diagram. Also find its unilateral and weak components.

07

- (b)** Define Sub group. Find the subgroups of $(\mathbb{Z}_{10}, +_{10})$

02

05
